

## Pipe & Cable Locating Metrotech 810DX

Savcor Product proudly introduces the New Metrotech 810 Dx Pipe and Cable Locator, a single frequency high productivity instrument designed for locating all types of buried utilities.

The Model 810 Dx continues three decades of innovation by introducing the constant current transmitter and a newly designed ergonomic receiver.

Together, the “system” maximizes the electromagnetic signal applied to the pipe and is more resistant to all types of weather conditions, truly a locating instrument for all seasons.

*Utilizing unique transmitter technology, the 810 Dx is capable of maximum power using three levels of output and the special constant current circuitry.*

Sensing the resistance in the circuit including pipe and ground return, the transmitter applies the proper voltage to achieve a constant current output.

The result is maximum signal strength without operator intervention. Some may call this a Smart Maximum Strength transmitter or SmartMax™.

Transmitter power levels are easily selected using oversized buttons for a better tactile feel even when using gloves. Extra bright LED's illuminate the selected power level.

The 810 Dx Transmitter is lightweight, making it easy to carry to the work site, and specifically designed for rugged contractor environments.

For power, select from standard “D” cell alkaline or a NiMH battery pack.

The ergonomic design of the receiver is immediately evident, with a special moulded handle for added comfort reducing arm fatigue during those long days of utility locating.

Large bright LCD, loudspeaker and intuitive operation make the 810 Dx receiver the most comfortable and quick instrument to carry all day.

*Savcor supply and service the full range of Metrotech Pipe, Cable, Sheath location, and Water leak detection locators.*

*Our service department can also arrange training on locator operations, and are fully qualified by Metrotech to carry out all warranty repairs, calibrations, and repairs.*

*Depending on your needs, Savcor can advise you on the most operate locator for needs, whether it is a reliable affordable unit, or a high tech machine for user that require optimum performance in demanding environments.*

**Receiver**  
*New Look and Ergonomic Design  
Liquid Crystal Display with backlighting  
Volume control  
Improved Weather Resistance*

**Transmitter**  
*Multi-Power Level Transmitter  
1-watt Maximum Output –Maximum allowed by FCC  
Hi-Efficiency Transmitter Circuitry  
NiMH Battery Pak Option  
Improved Weather Resistance*
